

Lesson: Practice Exercise

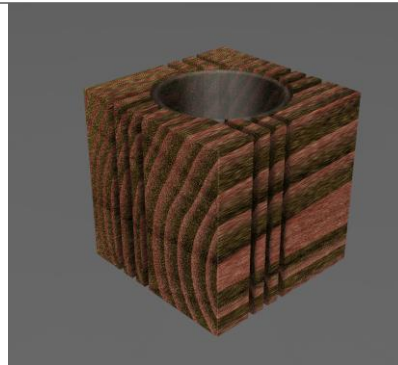

Practice: Change an appearance and create a rendering.

Learning Objectives:

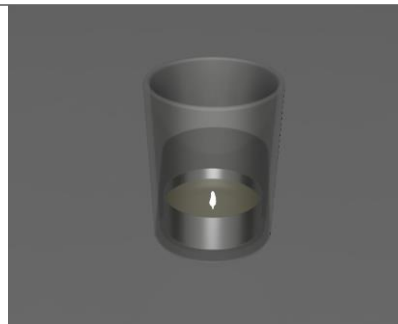

- Change an appearance.
- Create a rendering.

Step 1: Change an appearance and render

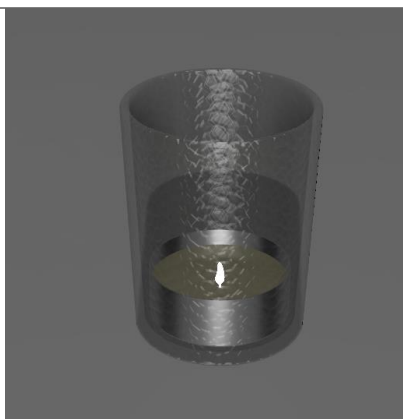

1. Continue with the Wooden Votive Holder file in the render workspace.

2. Hide the component Holder:1 to only show the Tea Light and Votive.

3. Press A on the keyboard to open the Appearance dialog. Navigate to a Textured Glass appearance of your choice and drag/drop it onto the Votive. In this image I used Glass – Mosaic.

4. Create a cloud render of the Votive and Tea Light.
