

Lesson: Practice Exercise

Practice: Convert a body to a component and create a new component from a feature.

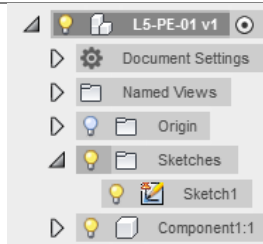

Learning Objectives:

- Convert a body to a component.
- Create a new component from a feature.

Step 1: Create components

<p>1. Upload the file L5-PE-01.f3d.</p>	
<p>2. Open L5-PE-01 and expand the Bodies folder in the browser.</p>	
<p>3. Right-click on Body1 in the browser and select "Create Components from Bodies".</p>	

4. Expand the Sketches folder and show Sketch1.

5. Select Create > Revolve and create the revolve using the profile and axis shown. Making note to set the Operation to "New Component".

6. The browser should contain two unique components. Save the file.
