

Lesson: Share a link for design review

In this lesson, you will share your design on Fusion Team for other team members to review.

Learning Objectives:

- Create a share link.
- Start a Live Review.

Step 1: Create the share link.

<p>1. Carry on with the file from the previous example. Note the Comments box in the lower left of the screen. In addition to a written comment you can also capture and post an image. These are all saved with the design.</p>	
<p>2. Open the Data Panel and select the version icon then select Open Details on Web. This opens Fusion Team and allows you to look at the design.</p>	
<p>3. To collaborate with other users, click on the Share button. Copy the link then click Close. Paste the link into your internet browser and investigate the numerous ways you can interact with the model.</p>	
<p>4. Investigate the options when you click the Comments button.</p>	

5. Also investigate the options in the overview section. Then close the internet browser.
