# Lesson: Render still images and turn-table animations

In this lesson, you will render a still image of the Lamp model.

Learning Objectives:
- Produce a cloud render.
- Produce a turn-table render.

Step 1: Render the model.

1. Carry on with the drawing file from the previous example. Click on Render to open the Render properties panel. Open the Custom tab, select 800x600, 0.5 MP for the Image Size, Cloud Render for the Render With option, and Final for the Render Quality option. Click Render.	
2. View the completed render by clickin on the thumbnail in the Rendering Gallery.	
3. Once viewing the final render, click on the Turntable option to open the Turntable properties panel. Click Close.
